

SAFFE Furniture knows that height adjustable tables are an important part of creating a flexible and functional space, and not all height adjustable tables are created equal. That's why we created our Alto Table. A quality height adjustable solution featuring a pneumatic easy-up mechanism making it simple to raise and lower. Alto tables are unique because they adjust without power, so there are no extra cables and cords tying you down. Its strong brake system means it won't bounce or sink when you put the items you need on the table.

## FEATURES & SPECS

- High pressure laminate (HPL) worksurface with balancing backer and 3MM edge
