

OSCODA ROBOTICS CART

At SAFFE Furniture, we know robotics programs are booming in schools—but until now, most robotics tables were oversized, immobile, and difficult to repurpose. That’s why we designed the SAFFE Robotics Cart System: a first-of-its-kind, flexible solution that adapts to your program’s needs. Use the two carts individually (30”d x 96”w) for everyday classroom storage and workspace, or dock them together with built-in magnets to create a massive robotics surface (60” D x 96” W). Why settle for a giant, immobile robotics table when you can have a flexible, mobile, and multifunctional solution? The SAFFE Robotics Cart System is designed to grow with your program, giving you the freedom to use your space your way.

FEATURES & SPECS

- Set-up includes two carts individually (30”d x 96”w) together (60”d x 96”w)
- System includes acrylic bumper system and clamps for mounting
- When paired, the carts create a usable 34” high robotics platform, perfect for robotics competitions
- Designed to accommodate robotics challenge mat sized 44.75”d x 92.75”w. (*Robotics mat not included*)
- Limited lifetime warranty
- Made in the USA

EXAMPLES

Docking magnets on the carts ensure they will stay together when in use and can be pulled apart and rearranged when the robotics system is not in use.

With the carts pushed together create a massive robotics surface. Designed to accommodate robotics challenge mat. Robotics mat not included.
